## FOREWORD

This **Summary Reference Index** represents a key to the contents of CANSIM, the Canadian Socio-economic Information Management System,<sup>1</sup> and is the first step in locating and ordering time series from the system. The table of contents lists those publications for which data are now stored in CANSIM in full or in large part. For each publication, in turn, there is a modified table of contents which identifies the sets of series in CANSIM and gives for each set its identification number in CANSIM, that is, its CANSIM matrix number or numbers. A "matrix" in CANSIM is roughly equivalent to a "table" and contains a number of related time series. Additional sets of series will be stored in CANSIM as time and resources permit. Index supplements will be published accordingly.

As the first step in ordering from DBS data which is stored in CANSIM, the user locates in this Index first the general area of interest and then the specific matrices. As step two, the CANSIM numbers at the right hand side of the page are used to locate the matrices in the **CANSIM Matrix Directory** which is a computer printout available from DBS without charge. In the **Matrix Directory** the matrices are listed in numerical order. Here the user finds for each matrix a title which gives a general description of the series included, the data source and, in some cases, a matrix note providing additional information of importance.

As step three, users select matrices in which they are interested, note the corresponding CANSIM matrix numbers, and use these numbers to order from DBS a **CANSIM Series Directory**. This is a computer printout for which users pay a small charge to cover the cost of printing. The **Series Directory** contains titles and other descriptive detail for all series in the matrix. It also contains the unique series identifiers (CANSIM numbers) which must be used in ordering data from DBS. The fourth step, the actual ordering of the data, is described in detail in the **CANSIM Users' Manual** cited as (c) in the footnote below.

In addition to the CANSIM identification numbers, readers will note that a second identification number is shown both in this Index and in the **Series Directory**, i.e. the "MASSAGER" identification number. The purpose and use of this second number is described in detail in the **CANSIM Users' Manual**.

## FOREWORD

THIS SUMMARY REFERENCE INDEX REPRESENTS A KEY TO THE CONTENTS OF CANSIM, THE CANADIAN SOCIO-ECONOMIC INFORMATION MANAGEMENT SYSTEM,\* AND IS THE FIRST STEP IN LOCATING AND ORDERING TIME SERIES FROM THE SYSTEM. THE TABLE OF CONTENTS LISTS THOSE PUBLICATIONS FOR WHICH DATA ARE NOW STORED IN CANSIM IN FULL OR IN LARGE PART. FOR EACH PUBLICATION, IN TURN, THERE IS A MODIFIED TABLE OF CONTENTS WHICH IDENTIFIES THE SETS OF SERIES IN CANSIM AND GIVES FOR EACH SET ITS IDENTIFICATION NUMBER IN CANSIM, THAT IS, ITS CANSIM MATRIX NUMBER OR NUMBERS. A "MATRIX" IN CANSIM IS ROUGHLY EQUIVALENT TO A "TABLE" AND CONTAINS A NUMBER OF RELATED TIME SERIES. ADDITIONAL SETS OF SERIES WILL BE STORED IN CANSIM AS TIME AND RESOURCES PERMIT. INDEX SUPPLEMENTS WILL BE PUBLISHED ACCORDINGLY.

AS THE INITIAL STEP IN ORDERING FROM DBS DATA WHICH IS STORED IN CANSIM, THE USER LOCATES IN THIS INDEX THE GENERAL AREA OF INTEREST, AND THEN THE SPECIFIC MATRICES. THESE CANSIM MATRIX NUMBERS AT THE RIGHT OF THE PAGE, ARE THEN USED TO LOCATE CANSIM AND/OR MASSAGER SERIES IDENTIFIERS, IN THE SERIES DIRECTORY. THE SERIES DIRECTORY LISTS THE MATRICES IN MATRIX ORDER, AND PROVIDES A DESCRIPTIVE TITLE OF EACH MATRIX, THE DATA SOURCE, AND MATRIX NOTE. EACH MATRIX, IN TURN, CONTAINS TITLES AND DESCRIPTIVE DETAIL FOR ALL SERIES THAT MAKE UP THE MATRIX.

EITHER OF THE AFOREMENTIONED SERIES IDENTIFIERS MUST BE PROVIDED WHEN ORDERING DATA FROM DBS. THE DATA REQUISITIONING PROCESS AND PURPOSES OF THESE NUMBERS ARE DESCRIBED IN DETAIL IN THE CANSIM USERS' MANUAL (ITEM C BELOW).

AVAILABILITY OF NEW DATA BLOCKS WILL BE ANNOUNCED PERIODICALLY IN THE DAILY BULLETIN.

# CANSIM (Canadian Socio-Economic Information Management System)

## Foreward

This Summary Reference Index represents a key to the contents of CANSIM, the DBS computerized time series data bank, and is the first step in locating and ordering time series from the system\*. The Table of Contents lists those publications for which data are now stored in the data bank in full or in large part. For each publication, in turn, there is a modified table of contents which gives for each data set in the data bank its CANSIM matrix identification number or numbers. A "matrix" in CANSIM is roughly equivalent to a "table" and contains a number of related time series. Additional sets of series will be stored in CANSIM as time and resources permit. Availability of new data blocks will be announced periodically in the DBS Daily.

As the initial step in ordering from DBS data which is stored in CANSIM, the user locates in this index the general area of interest, and then the specific matrices. The CANSIM matrix numbers at the right of the page are then used to locate the data set in the Series Directory. The Series Directory lists the matrices sequentially by matrix number, and provides for each a descriptive title, data source, a matrix note and a list of the titles and other descriptive details for all included series (see sample below).

To order series from DBS the CANSIM matrix and series identifiers are required. The data requisitioning process is described in detail in the CANSIM User's Manual (Item C below).
